

GRAPEFRUIT SERENDIPITY

We've gone fruit crazy this month with more than 3 fruit beers (if you want to include a few more on external collaborations) here we have a serendipitous development of a beer. We had a big IPA in the tank which we felt needed some diversity... Trending this month are many other fruit beers some low abv and some no abv... so lets hit you on the high side with a 9,2% ABV DIPA style and give it what it needs...Grapefruity goodness! The Grapefruit is subtle but gives it some tangy sharpness that together with the huge hops gives the otherwise sweet boozyness a crisp & drinkable touch.
